ShopEase Support Agent

AI customer support with human escalation: chat, admin panel, API, tracing, database and payments

1. LangSmith Tracing

support-agent traces dashboard: 20 traces, latency stats (P50/P99), 0% error rate.

2. FastAPI Docs (Swagger)

ShopEase Support Agent API endpoints: health, chat, admin login/logout, tickets, orders, customers.

ShopEase Support Agent API 0.1.0 OAS 3.1

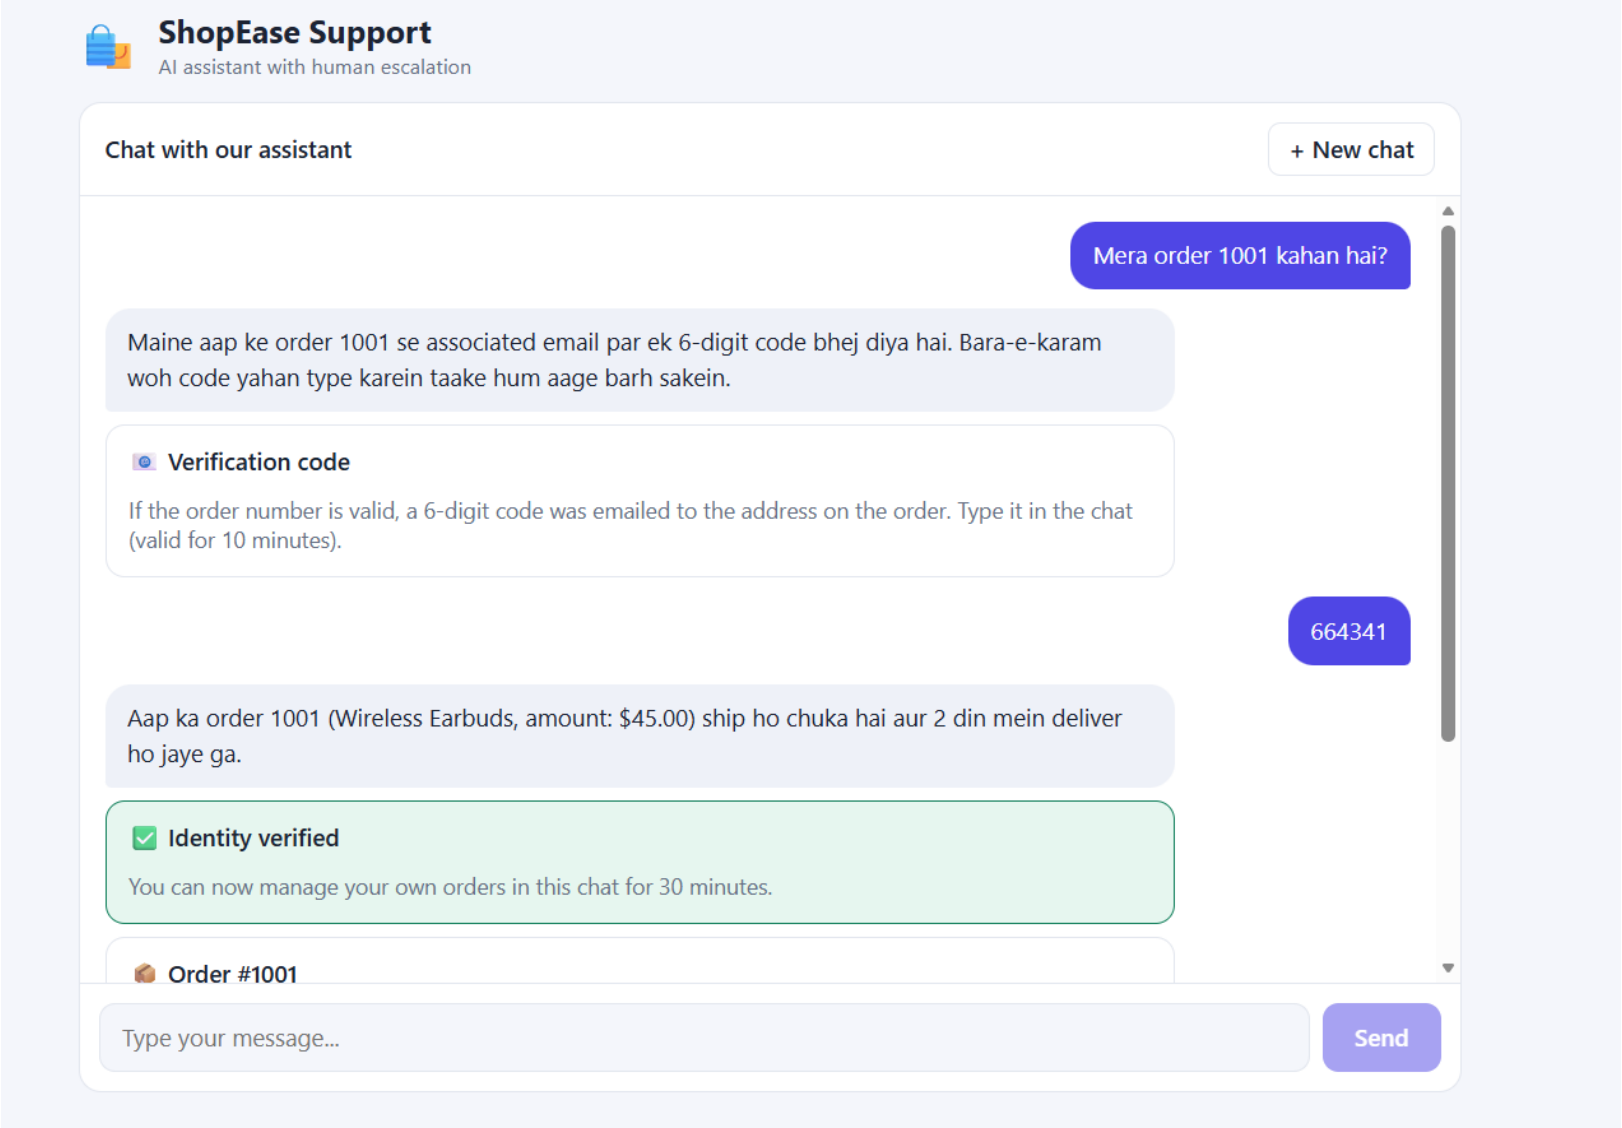

/openapi.json

default

- GET /api/health Health
- POST /api/chat Chat
- POST /api/admin/login Admin Login
- POST /api/admin/logout Admin Logout
- GET /api/tickets List Tickets
- PATCH /api/tickets/{ticket_id} Update Ticket
- GET /api/orders List Orders
- POST /api/orders Create Order
- GET /api/customers List Customers

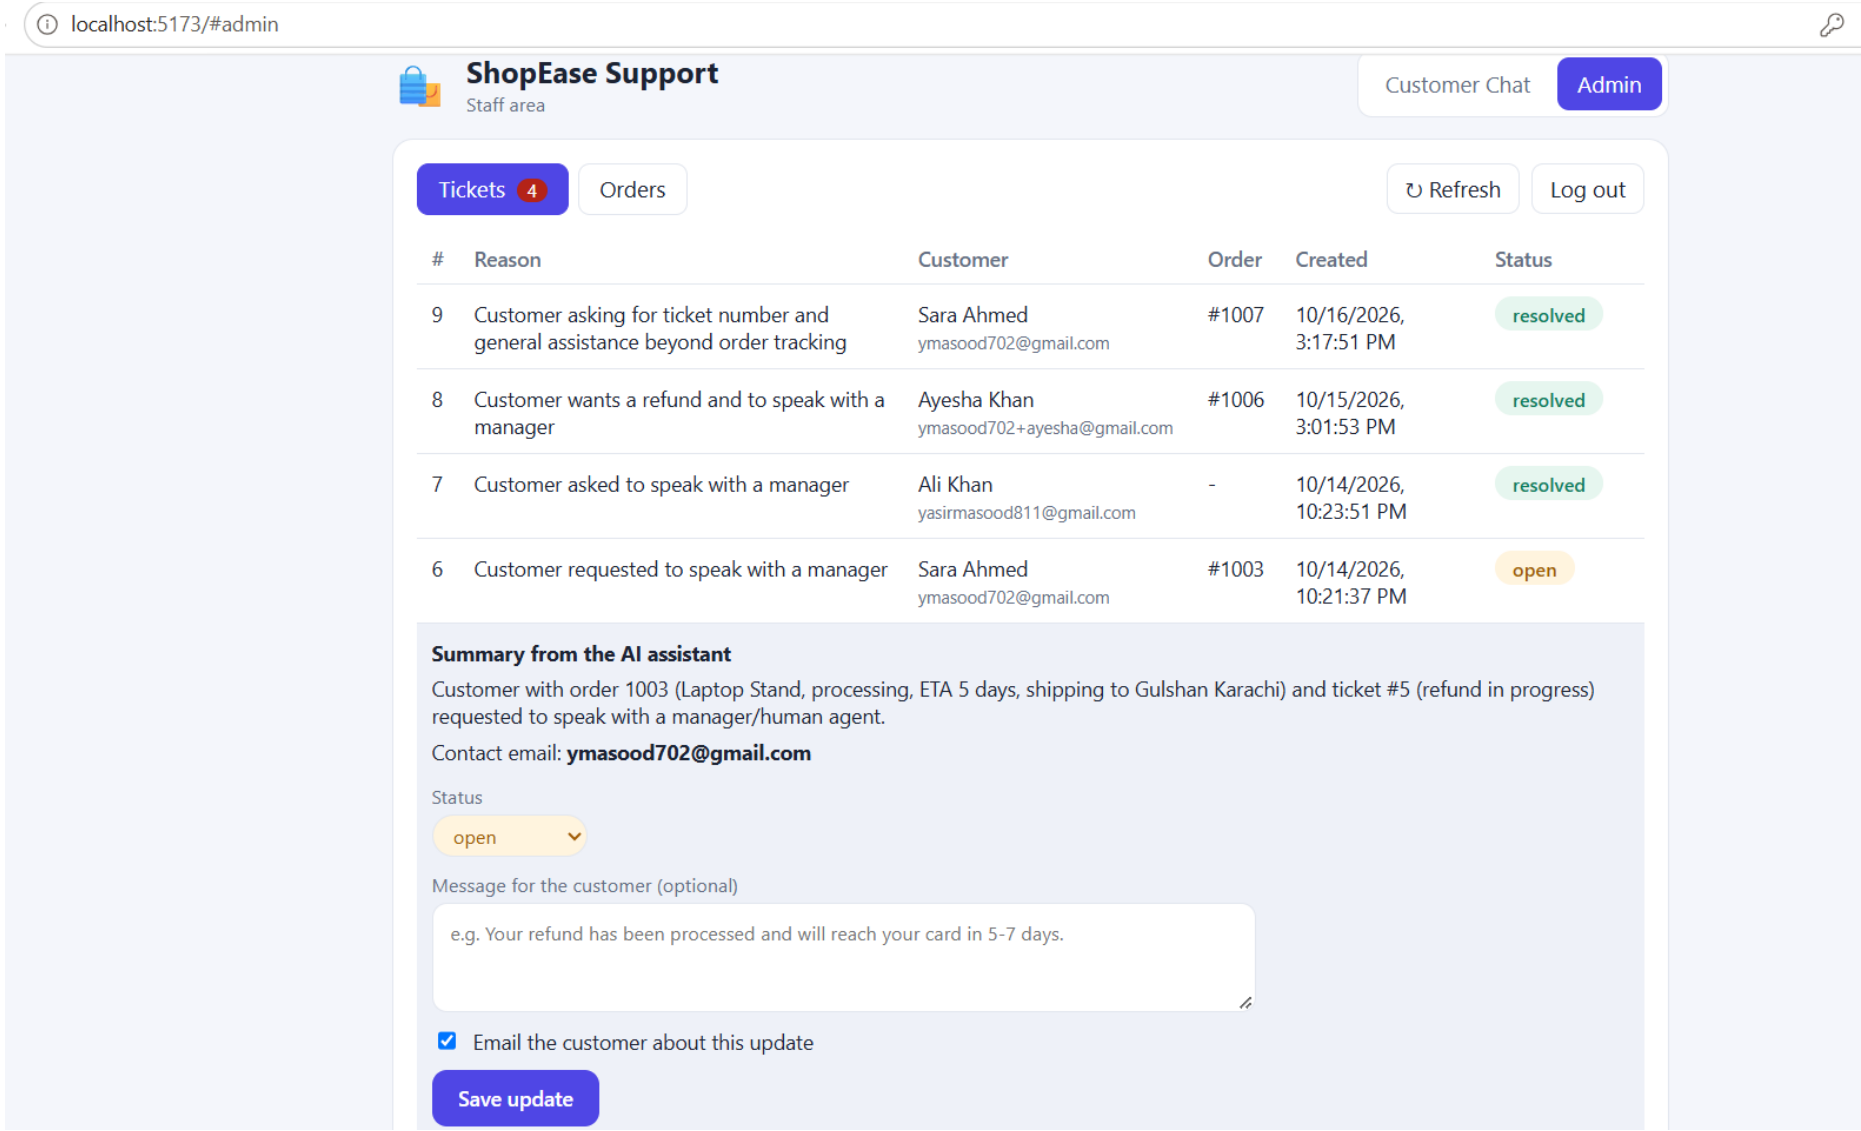

3. Customer Chat: Order Verification

Order lookup with a 6-digit email verification code and the 'Identity verified' confirmation.

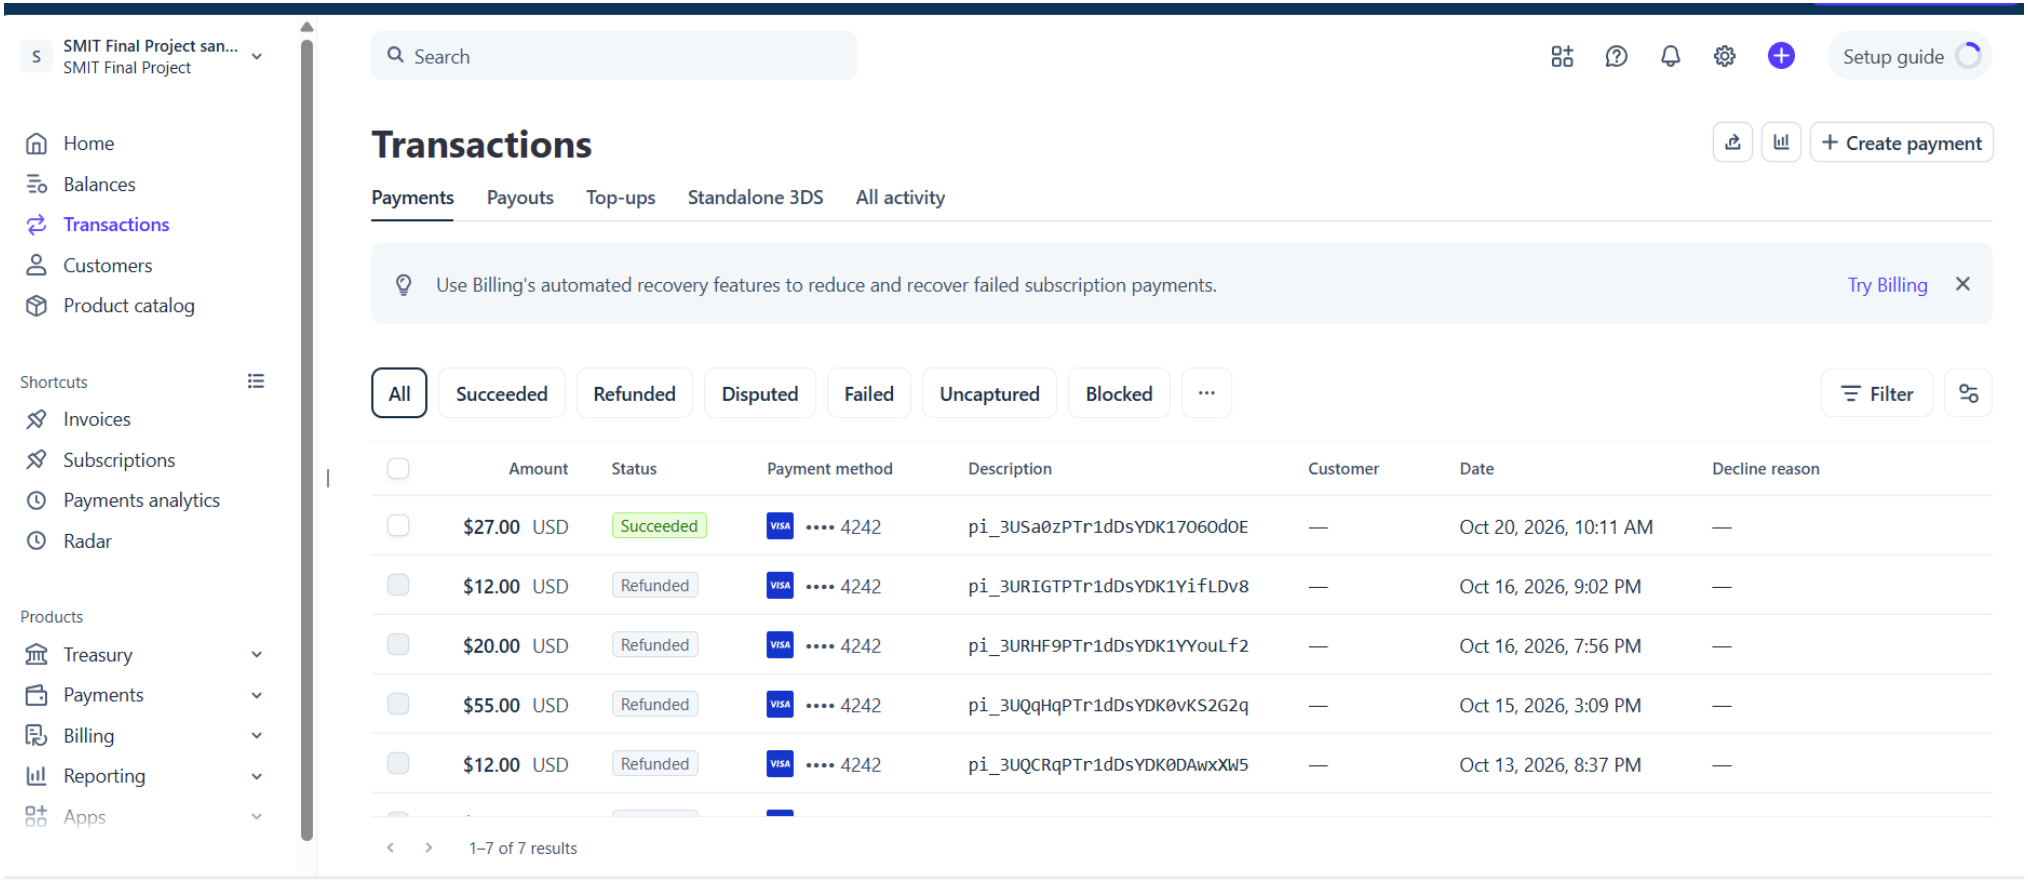

4. Admin Panel: Tickets

Escalated tickets list with the AI-generated summary and the status update / customer email form.

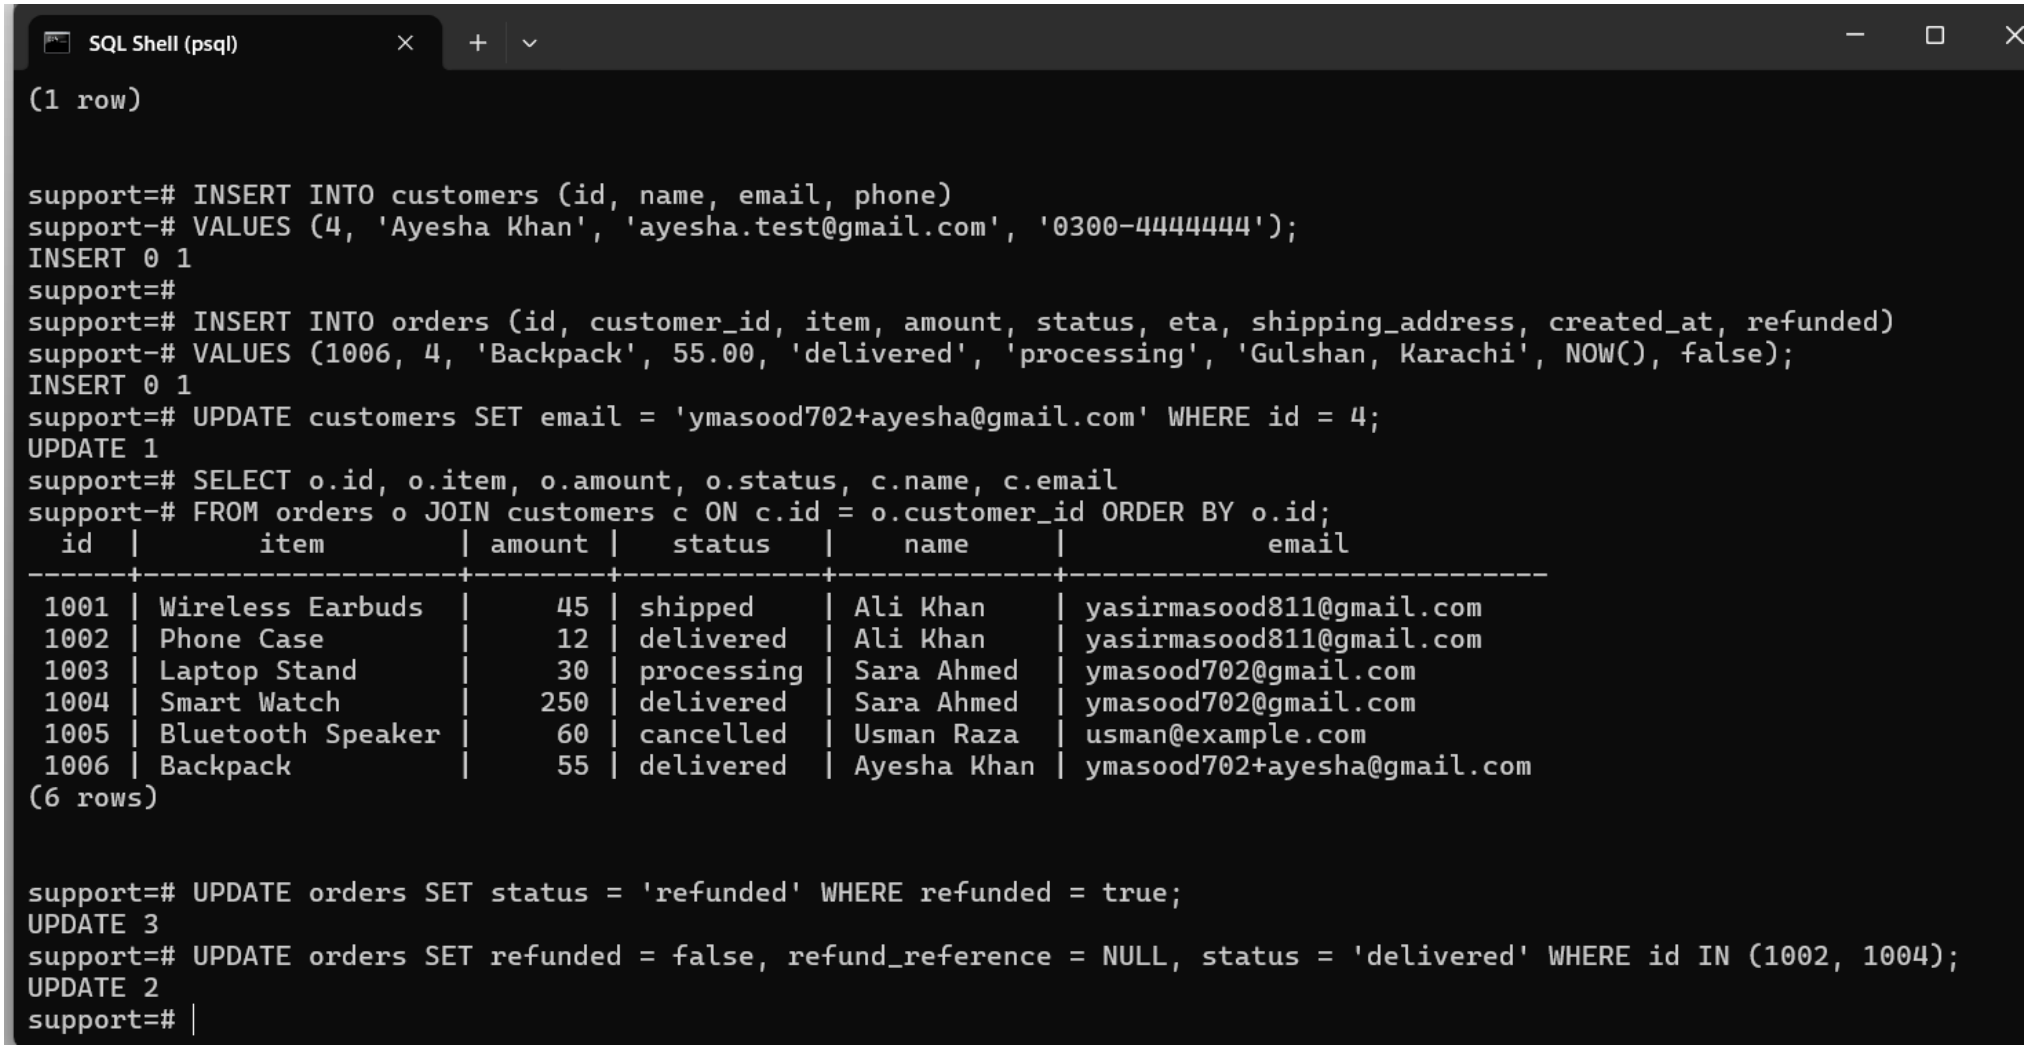

5. Stripe Dashboard

Test-mode transactions showing succeeded and refunded payments.

6. PostgreSQL Shell

Inserting a customer and order, a join query across orders and customers, and refund status updates.

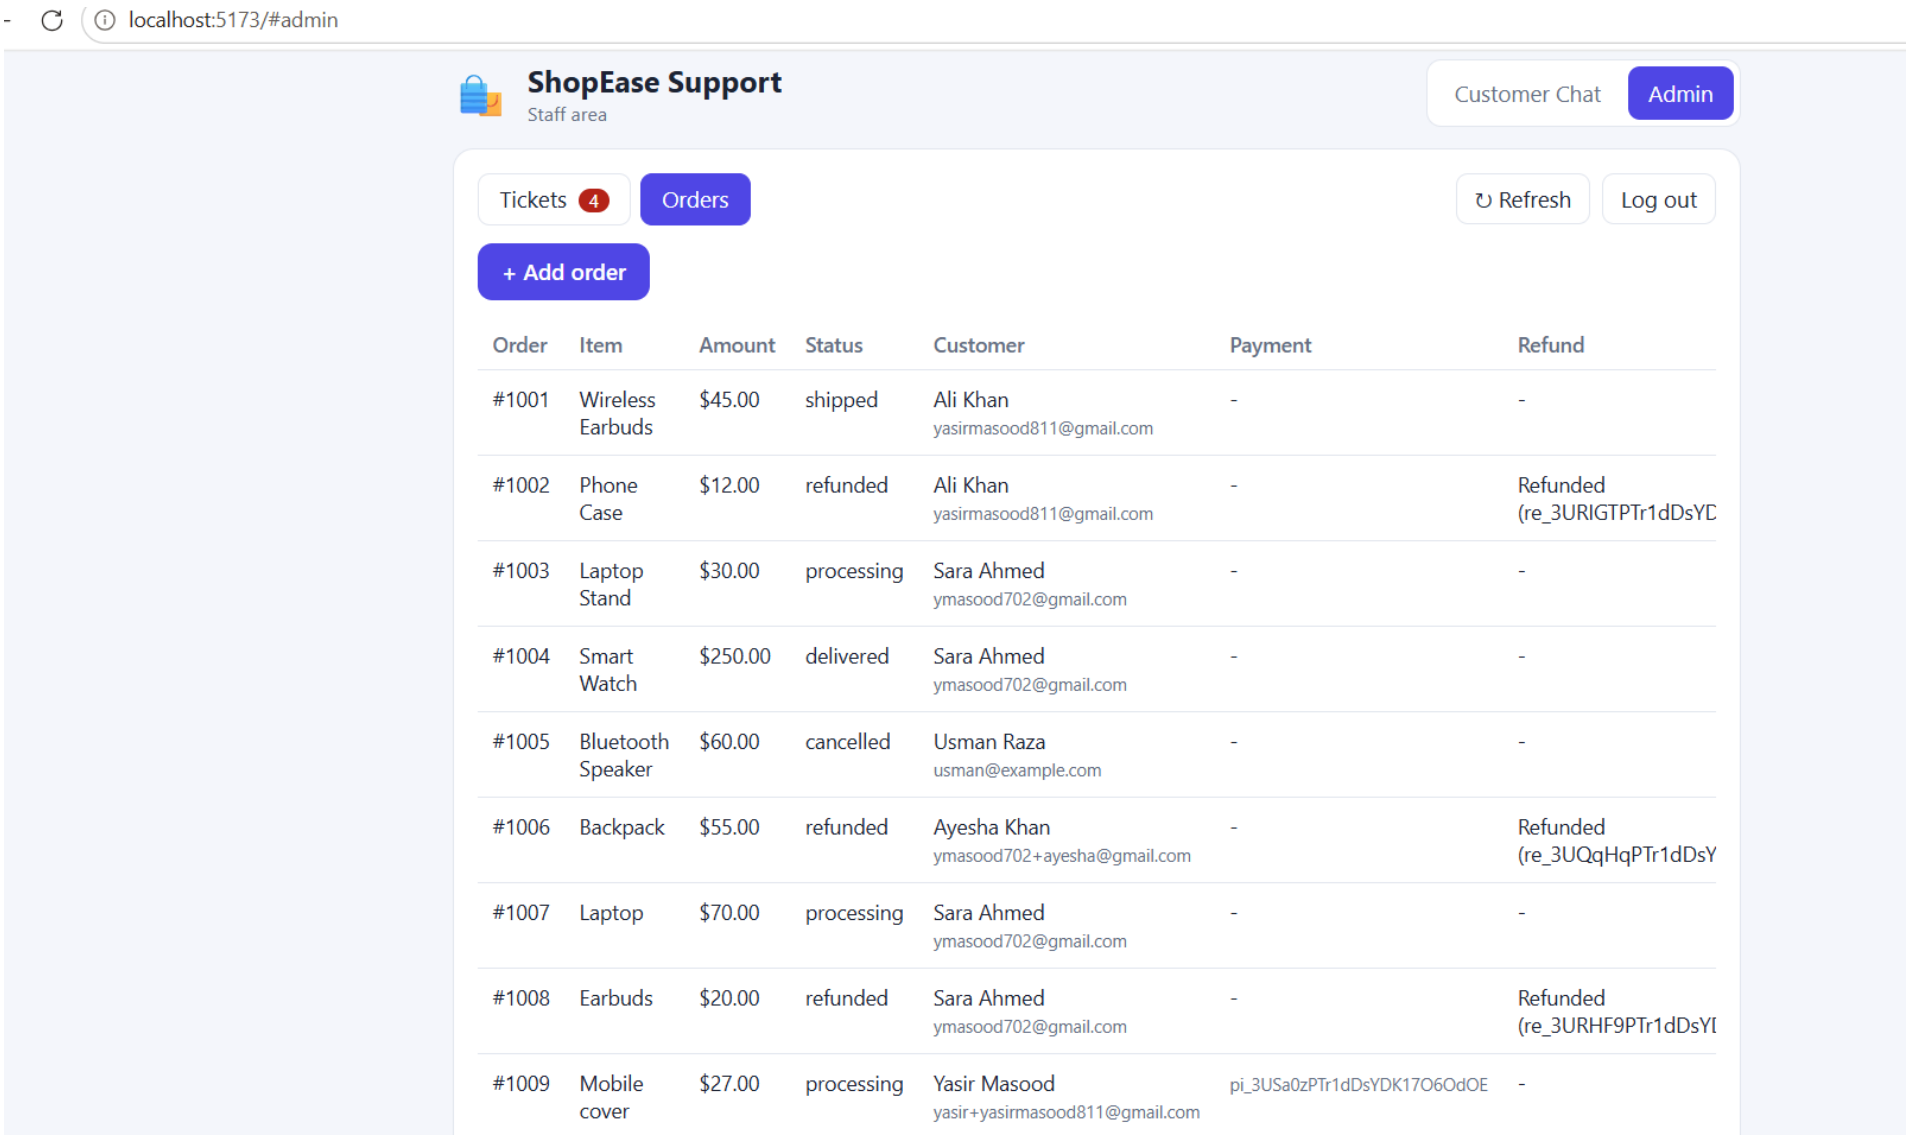

7. RAG Testing

Testing RAG: the assistant answers a refund policy question from the knowledge base in Roman Urdu.

8. Admin Panel: Orders

Orders list with customer, payment reference and refund reference columns.

9. Admin Login

Password-protected staff area login screen.
